

Aravo Solutions

Job Title: Senior Java Engineer
Department: Engineering
Revision Date: November 9, 2007

POSITION SUMMARY

San Francisco based Aravo Solutions is looking for a Senior Java Engineer to join its team. The engineer will work as part of the core product team in building innovative collaboration solutions for our on-demand Supplier Information Management platform

WHY JOIN ARAVO?

- We are a group of talented and experienced people who enjoy our work and are excited about building a great product and building a great company.
- We are very selective about who we hire because we are a small company that solves difficult problems through constant collaboration in a team-oriented environment.
- We value work-life balance, knowing that it is more important to be sharp and productive while you are at work, than it is to be at work all of the time.
- There are always opportunities to step up and contribute to the success of the company and to be recognized for those contributions.

WHY JOIN THE ARAVO ENGINEERING TEAM?

- Our engineering team is encouraged to think creatively about how to use the best technologies available to solve the variety of problems that are presented by our customers, our prospects, and the market in general.
- We work collaboratively to solve problems, but also maintain a high level of trust and respect across the team that each engineer is capable of doing the job right.
- We strive as a team to push each other in new directions, making sure each of us is well positioned not only for today's challenge but for the future as well.
- Our team has a proven track record of successful releases of a high quality product.

POSITION REQUIREMENTS

REQUIRED

- Senior level Java engineer with 5+ years hands-on experience
- Expert in J2EE web applications (EJB, JMS, JDBC/SQL, Servlets, JSP, etc.)
- Strong Object Oriented analysis and design

NOTE: This job description is not intended to be all-inclusive. Employee may perform other related duties as negotiated to meet the ongoing needs of the organization.

- Familiarity with a variety of open source tools and libraries
- Experience in full software life cycle development: analysis through release
- Great communication skills, highly self-motivated and good teamwork

PREFERRED

- Experience with e-Procurement, SRM or other Supply Chain applications
 - Experience in the area of Corporate Social Responsibility
 - Experience with distributed workflow systems
 - Comprehensive understanding of XML and related technologies
 - Expertise with Java based web services
-
