## Aravo Supplier Information Management: Closing the Enablement Gap

**A**ravo Supplier Information Management gives companies the solution they need to close the gap between enterprise system expectations and results. Aravo automates and manages the entire supplier information lifecycle and continually updates data across business systems, enabling companies to gain greater value from their relationships with all types of suppliers.

Aravo lets companies quickly and accurately onramp and manage virtually any kind of supplier so they can meet savings objectives, improve process efficiency, and turn supplier information into a valuable strategic asset that can be leveraged across the organization. Supplier Information types include qualifications, profiles/contacts, catalogs, contracts, financial data, regulatory/environmental compliance, and more. Out-of-the-box best-practice functionality delivers results in days, rather than years.

On-demand, SaaS delivery eliminates the large up-front cost and maintenance burden of traditional software tools. Role-based dashboards give all supply chain partners instant access to accurate information in real time, providing a single source of supplier

truth that supports effective collaboration.

Only Aravo delivers a centralized on-demand solution that gives companies the speed, visibility, and scalability they need to effectively onboard and manage their supplier base. With a sole focus on supplier information management, Aravo has unparalleled expertise in helping customers transform supplier data into a strategic business asset. Low cost of entry and rapid time to delivery provide immediate value and cost savings. Proven Aravo technology and continuous solution enhancements enable customers to quickly capitalize on new and better ways of doing business.
